

Greetings! I look very forward to working with you and your child this school year. Whether it has been in the field exploring natural science with campers, homeschooling our two children or instructing in the classroom, I bring over 25 years of experience. Teaching and training have always been at the heart of what I do.

I live in Prospect with my husband Matt, who is the Associate Vice President for Administration and Finance at Longwood University. Our daughter Amanda, Longwood 19', and her husband Zachary, Longwood 18', live in Petersburg. Amanda is a Police Officer for Chesterfield County. Zach is a Historian at the Pamplin Historical Park. Our son Connor, Longwood '21, is currently working at the YMCA Estes Park Center in Colorado.

I have a degree in Biology from Kent State University and absolutely love "everything nature", particularly birds and insects. Botany ranks right up there as well. I love to cook, hike, bike, read and love on our pets. Maggie girl, a beagle we adopted recently from Southside SPCA, pretty much owns us. We also have two great cats: Doc and Snickers.

Now, let's jump right in. In these unprecedented times, we are a team more so than ever. It is my goal to offer as much information as possible while also navigating through with you. As with last year, the following requirements are in place:

- All students PK-12 must come to school with a mask on their person each day
- Google Classroom will be our common platform for class information and assignments if ever needed due to Covid protocol.

Want more? Located on our website under our Class Pages, you will find resources, providing lots of information for you to use today and beyond.

I am truly honored to be a part of Fuqua School and look forward to working with you! I am here for you. Don't hesitate to reach out any time.

Warmly,

Mrs. (Trish) McGregor
